Professional Summary :
Full Stack developer with +1 year of hands-on experience within collaborative development teams, building scalable and production-ready web applications using React, TypeScript, and TailwindCSS, with solid backend exposure to Laravel, PHP, and MySQL. Experienced in optimizing application performance, integrating RESTful APIs, and contributing to Agile team-based development. Proven ability to solve real-world technical challenges and deliver high-quality, user-focused solutions.

Education
Assiut University – Faculty of Science – Grade: Very Good

Professional Experience
Frontend Developer – Freelance (Upwork) | Jan 2025 – Present
- Developed responsive and scalable web interfaces using React, JavaScript, HTML5, CSS3, and TailwindCSS.
- Translated client requirements into technical solutions and iterated based on feedback.
- Collaborated with backend developers and designers to deliver business-driven features.
- Managed tasks independently and communicated directly with clients.

Backend Developer – Huma-volve (Training) | Jan 2025 – Mar 2025
- Developed and optimized RESTful APIs using Laravel (Re7lty API 2 & Qiem API 2).
- Improved API response time by ~30% and integrated third-party services.
- Gained hands-on experience in backend architecture, performance, and reliability.

Projects
Frontend Developer – CityPhone (NOV 2025 – JAN 2026)
- Worked within a cross-functional Agile team (frontend, backend, QA) using **React, TypeScript, TailwindCSS** and RESTful APIs.
- Led performance optimization efforts after identifying bottlenecks caused by excessive API requests and shared global state.
- Refactored state management and centralized API calls, reducing unnecessary re-renders and improving page load time by ~40%.
- Collaborated with backend developers to align API contracts and improve data consistency across the platform.
- Tech Stack: React, TypeScript, TailwindCSS, REST APIs, Git, Agile/Scrum.
- Live: https://cityphone.sa7ret-elqalam.blog/ar/login | Admin: https://system.cityphonesa.com/dashboard

MedTek Health Platform (Freelance | AUG 2025- NOV 2025)
- Large-scale health platform built as part of a distributed freelance team (5 members) (frontend, backend, UI/UX).
- Integrated RESTful APIs across multiple modules and implemented interactive dashboards for business insights.
- Developed advanced UX features for product creation, reducing manual data entry errors by ~50%.
- Identified and fixed a critical issue where pages failed to fetch data without manual reload due to improper token scope.
- Tech Stack: React, TypeScript, REST APIs, Charts, Git.
- Live: https://medtek.sa7ret-elqalam.blog | Admin: https://med-tek.abaadre.com/admin/dashboard

Frontend Developer – Orion Design Engineering Website (Freelance | JUN 2025 – JUL 2025)
- Corporate website developed within a **3-member team** (frontend + backend).
- Built a fully responsive UI using React, translating Figma designs into clean, reusable components.

- Identified performance bottlenecks caused by heavy image usage and resolved them using lazy loading and image optimization.
- First professional exposure to RESTful API consumption and client-driven requirements.
- Tech Stack: React, JavaScript, HTML5, CSS3, REST APIs.
- Live: https://oriondesigeng.com

Front-End Developer – SafeHer Anonymous Reporting Platform (Bootcamp Project | NOV 2025)
- Developed a secure anonymous reporting platform focused on **user privacy and safety**.
- Implemented multilingual UI (3 languages) and accessibility-friendly components.
- Designed flows to minimize data exposure and ensure anonymous submissions.
- Collaborated within a **team** under mentor guidance, following Agile practices.
- Top Final Project – Women Techsters Bootcamp.
- Tech Stack: React, JavaScript, HTML5, CSS3, REST APIs.
- Live: https://safeher-ten.vercel.app

Car Rental Management System (Laravel & MySQL)
- Full-stack system for cars, bookings, and user management
- Optimized database queries and backend logic, improving booking processing speed by 25%
- Developed laravel blade with authentication and role-based access

Re7lty API 2 & Qiem API 2 (Laravel)
- Backend API development and optimization, reducing server response time by 30%
- Integrated third-party services and handled production edge cases

Technical Skills
- **Backend:** Laravel, PHP, MySQL, RESTful APIs
- **Frontend:** HTML5, CSS3, Bootstrap, TailwindCSS, JavaScript, TypeScript, React.js
- **Tools & Practices:** Git, GitHub, Postman, APIDOG, Third-Party API Integration, Agile/Scrum

Courses
Women Techsters Bootcamp Cohort 4.1 – Software Development (Nov 2025)
- Hands-on training in frontend development using HTML5, CSS3, Bootstrap, JavaScript, and React.
- Worked within a team following Agile practices to design and deliver a complete web application.
- Collaborated with mentors and senior engineers who provided technical guidance, code reviews, and best practices.
- Strengthened skills in teamwork, communication, problem-solving, and real-world project delivery.

Frontend Development in RTC
- HTML5, CSS3, JavaScript and React.js

Backend Development (Advanced Laravel & Basics PHP) – UN Women Scholarship (2024)
- Advanced Laravel concepts, MVC architecture, authentication, RESTful APIs
- PHP fundamentals, CRUD operations, and MySQL basics

C Programming – Gammal Tech

Languages
English – Very Good
